Computer Science student building mobile applications with React Native and Flutter. Experienced in mobile UI development, backend integration, real-time data, and location-based features; seeking a Mobile Application Developer internship.

Technologies and Languages

- Languages: TypeScript, JavaScript, Dart, Python, Java, C++
- Technologies: React Native, Expo, Flutter, React, Next.js, REST APIs, Firebase, Firestore, Convex, SQLite
- AI & IS: AI-Powered Application Development, Context-Aware AI Integration, LLM Integration, Computer Vision, Intelligent Automation
- Other: Git/GitHub, Component-Based UI, State Management, JSON Data Handling, Geolocation, UI/UX Design, Object-Oriented Programming, Database Design

Projects

VEC-PRO — AI-Powered Mosquito Surveillance & Forecasting System
Thesis Project · React Native · Expo · TypeScript · Next.js · Convex · Clerk

- Built AEDEX, a React Native mobile app with Clerk authentication and a Convex backend for community breeding-site reports with image submissions.
- Implemented mobile map interfaces and location-based reporting; configured Expo EAS profiles for Android APK builds.
- Developed AEDIFY, a Next.js verification and task-management platform; integrated AI image classification and weather-based mosquito spread forecasting.

VISAIA — Farm Management & Pest Monitoring Mobile App
Flutter · Dart · Firebase Authentication · Cloud Firestore · Provider · REST APIs

- Built mobile workflows for farm setup, crop cycles, activity logs, and pest monitoring, with Firebase authentication and Firestore data storage.
- Integrated GPS-based field mapping and image uploads to a pest detection API; parsed JSON results into pest findings and treatment recommendations.
- Used Provider for shared farm state and organized the app into reusable widgets, models, and service layers.

enCast — Household Energy Simulation Mobile App
Flutter · Dart · Mobile UI Development · Energy Consumption Simulation

- Co-developed a Flutter app for organizing household sections and appliances, including wattage and usage inputs to estimate electricity consumption and cost.
- Built interactive what-if simulations and visual summaries to show how changes in appliance usage affect estimated energy use and household costs.

SYNT-ASK — Multiplayer NLP-Based Impostor Detection Game
React · TypeScript · Python · Flask-SocketIO · Socket.IO · DistilBERT

- Integrated a React client with Flask-SocketIO for synchronized multiplayer sessions, submissions, and chat; built a Siamese DistilBERT pipeline to detect semantic outliers.

MEMOWEE — Face & Speech Recognition for Memory Support
Python · TensorFlow · CNN · HTML · CSS · JavaScript · Flask

- Developed a memory support system combining CNN-based face identification, speech-to-text, and conversation summaries to help users recall recent interactions.

Work Experience

Call Center Agent **iXL Solutions Philippines** **May 2023 – July 2023**
Inbound and 24HF Skills Iloilo City, Philippines

- Handled high-volume inbound customer interactions, troubleshooting issues and providing solutions based on established processes.
- Navigated multiple software systems to access information, document interactions, and resolve customer requests accurately.
- Collaborated with team members to escalate complex issues while consistently meeting quality and performance standards.

Bartender **Bugtong Bato Beach Resort** **March 2021 – April 2023**
Beach Resort Team San Joaquin, Iloilo, Philippines

- Delivered fast, accurate service in a high-volume beach resort environment, handling up to 50+ customer orders per shift during peak seasons.
- Communicated effectively with guests and coordinated with kitchen and service teams to ensure timely order fulfillment.
- Maintained bar inventory and ensured stock availability, reducing shortages during high-demand periods.
- Resolved customer concerns promptly, contributing to positive guest feedback and repeat visits.

Education and Certifications

Bachelor of Science in Computer Science *Expected Graduation: July 2027*
West Visayas State University – Main Campus | Iloilo City, Philippines
Relevant Coursework: Data Structures & Algorithms · Database Systems · Software Engineering · Artificial Intelligence · Machine Learning · Web Development
Thesis: VEC-PRO — Multi-Staged Deep Learning Pipeline with Agent-Based Spatiotemporal Mosquito Spread Forecasting

Interests

- Building mobile applications with intuitive interfaces and practical workflows
- Integrating maps, real-time data, and AI services into mobile applications
- Exploring mobile architecture, API integration, and application performance, scaling architectures
